

Parent Appeal Process

- Following the annual Identification procedure and notification, a parent may appeal the Corporation Identification committee's decision.
- The parent may contact the building principal and/or the HAE Identification Coordinator to appeal.
- An appeal includes the chance for the HAE Identification Coordinator to discuss with the parent, in more detail, the evidence for his/her child compared to the entire pool for that grade.
- To seek a review, the parent should be ready to suggest why the data used is not indicative of the student's regular performance and what other information is available to review.
