

SIMPLE – QUICK – NO COST – UNLIMITED USE

The Swift MD telemedicine option has been getting great reviews from individuals that have tried this service for their acute care situations.

How it works: Those covered by the G-CCCS plan are already registered with SwiftMD. **There is no cost to you or those covered by the plan. NO CREDIT CARD or BANKING INFORMATION is ever needed.** Simply call [877-999-7943](tel:877-999-7943) and arrange an appointment time with an actual DOCTOR.

When a patient calls SwiftMD they will take your information, symptoms and any necessary history needed and then **you decide on a time for the Doctor to call you back.** It may be within a few minutes or you can schedule around your availability. Immediate call back times may vary based on the time of day but are generally less than 30 minutes.

If a prescription is needed they will call it in to the pharmacy of your choice (it will help to have the pharmacy name and phone number ahead of time if you anticipate a prescription). Your pharmacy would process the same as any other prescription under the health plan – it is not covered by SwiftMD.

A Great Option To Try When:

- You can't wait 2-3 days for an appointment
- Do not want to take time off from work for a minor ailment
- Need a quick second opinion after hours before using a clinic or an ER

Using a Quest Diagnostic Site for your lab work can potentially save you 60-85%. That can be real savings to you if you when covered by a High Deductible Health Plan. **It is not uncommon for a test to cost \$12-\$25 at a Quest site and over \$100 at other facilities. It pays to compare!**

TIP: If you need regular testing or have a non-urgent request for lab work. Let your doctor know you prefer to take the test to a Quest site because it is less expensive under your plan. They will generally provide you with a lab request you can take to any lab. The request will inform the lab technician of the specific test(s) to run and where to send the results. Results will be processed and sent directly to the requesting provider in a timely manner.
