

# Instructional Model

Imagine | Explore | Achieve | **more.**

## Purposeful Planning

- Collaborate in professional learning communities
- Use student data to drive instruction with multiple pathways to access and master learning
- Identify 21st century standards-based achievement goals
- Use course outline that includes rigorous expectations using research-based strategies
- Develop blended learning unit plans from course outline
- Identify classroom routines and procedures to be used
- Embed meaningful integration of technology usage in lesson design

## Assessing Understanding

- Use formative assessment to check for student mastery
- Utilize various methods to monitor class progress
- Develop summative unit assessments that use Depth of Knowledge questions in real world applications
- Analyze student data to reflect on gaps and inconsistencies

## Effective Instruction

- Use established routines and procedures to maximize instructional time
- Activate students' prior knowledge
- Demonstrate content knowledge
- Implement student engagement strategies
- Modify and differentiate instruction based on formative checks for understanding
- Use questioning strategies that encourage creativity, inquiry, and reflective thinking
