

MEDICAL NEEDS AT SCHOOL

Emergency Medical Authorization

The Corporation will distribute annually to parents or guardians of all students the Emergency Medical Authorization Form.

The Emergency Medical Authorization Form will be kept in an easily accessible file in each school building during the school year.

Any time the student is taken out of the Corporation by Corporation employees to participate in a school event (such as field trips, academic contests, music or athletic trips) the staff in charge of the event will take the Emergency Medical Forms for that student. This does not include student spectators at events.

The Corporation will follow the instructions of the Emergency Medical Authorization Form in the event of a medical emergency, provided however that the Corporation will defer to instructions provided by licensed health care professionals and/or first responders on the scene.

Student Emergencies and Accidents

If an accident or emergency occurs on school property; off school grounds at a school activity, function, or event; or traveling to or from school for a school activity, function, or event, the Board directs Corporation employees to take all necessary steps to render assistance to the student in good faith, which may include summoning medical assistance, administering first aid by persons trained to administer first aid, notifying administration, notifying the student's parent, and filing accident reports.

Employees should administer first aid within the limits of their knowledge of recommended practices. The Superintendent may provide for an in-service program on first aid and CPR procedures.

The administrator in charge must submit an accident report to the Superintendent on all accidents.

Administering Medicine at School

The administration of prescribed medication and/or medically-prescribed treatments to a student during school hours will be permitted only when failure to do so would jeopardize the health of the student, the student would not be able to attend school if the medication or treatment were not made available during school hours, or the child has a disability and as a result, requires medication to benefit from his/her educational program.

All medication needed during school hours or at school functions that are supervised by school staff, except those approved for student possession and self-administration under I.C. 20-33-8-13 or this Policy, will be administered by the nurse, administrator, or designated trained staff under the following conditions:

1. A written authorization form for medication administration must be completed by the parent/guardian and be on file before any medication transported to the health clinic (prescription or non-prescription) will be administered.
 - a. Medication shall be administered in accordance with the instructions printed on the bottle (in the case of non-prescription medicine) or the physician's order (on the case of prescription medicine).
 - b. The consent of the parent shall be valid only for the period specified on the consent form and in no case longer than the current school year.
2. All non-prescription medicine must be kept in its original container accompanied by the package label or package information.
3. All prescription medicine, including medication administered by injection, emergency medication (i.e. Epinephrine, Glucagon), and diabetes monitoring of a student must be accompanied by a physician's order, which is current and correct to the way that the student is to receive the medicine. The nurse may require additional information prior to administering medication.
4. All medication administration will be documented and kept on file in the health office.
5. If the medication is to be terminated prior to the date on the prescription, a withdrawal of consent of the parent is required. The written consent of the parent and the written order of the physician shall be kept on file in the health office.

The Corporation does not honor requests by parents or physicians to administer over-the-counter herbs, minerals and vitamins and other homeopathic products as there is currently no standardization relative to these products and no FDA approval and guidelines.

Any unused medication which is unclaimed by the parent will be destroyed by the Corporation when a prescription is no longer to be administered according to the authorization form, or at the end of the school year.

All designated staff responsible for administering medication to students will be trained by a registered nurse on the proper administration of medication and/or diabetes care. A record of this training will be kept on file in the health office.

All medication, both prescription and non-prescription, must be brought into the nurse's office by a parent or guardian. Only students meeting the criteria of Indiana Code or this Policy who have valid medical authorization and parent permission on file in the school office will be permitted to carry medications and self-administer such substances. These exceptions are explicitly stated in the law and detailed below.

Indiana law permits an individual or entity in a position to assist an individual who, there is reason to believe, is at risk of experiencing an opioid-related overdose, anaphylaxis, or respiratory related illness, to administer “emergency medication” defined as epinephrine, albuterol, or an overdose intervention drug, to an individual who is suffering an overdose.

The Corporation, in good faith, believes it is an entity in a position to assist an individual who there is a reason to believe is at risk of experiencing an opioid- related overdose, anaphylaxis, or respiratory related illness; therefore, it may obtain an overdose intervention drug, epinephrine, or albuterol from a prescriber or entity acting under a standing order issued by a prescriber and may maintain such intervention drugs on-site in school facilities to provide such assistance.

Self-Administered Medication

Students in grades 7-12 may possess and self-administer over-the-counter medications if the following conditions are met:

1. Form C525-F is filed with the clinic. After a student files Form C525-F with the clinic, the health assistant will verify the form is appropriately completed, verify the medication the student is carrying is as designated, and issue a medication pass to the student. Form C525-F must be renewed each school year.
2. The student has been given instructions as to how to self-administer the medication by the parent.
3. A one-day’s dose supply is the maximum that may be carried by the student.
4. The medication must be carried in the original bottle in which it was purchased.

After a medication pass has been issued to a student, the principal or his/her designee may at any time confirm that the student is complying with the terms of this policy by checking the contents of the over-the-counter medication package.

The School or School Board is not liable for civil damages as a result of a student’s self-administration of over-the-counter medication or prescribed medication for a chronic disease or medical condition except for an act or omission amounting to gross negligence or willful and wanton conduct.

Chronic Disease or Medical Condition

If a student does not meet the requirements to self-administer medication as set forth above, but the student is an individual with a chronic disease or medical condition, the student, in accordance with Indiana statute, may possess and self-administer medication for the chronic disease or medical condition on school grounds immediately before or during school hours, or immediately after school hours, or at any other time when the school is being used by a school group; off school grounds at a school activity, function, or event; or traveling to or from school for a school activity, function, or event, if the following conditions are met:

1. The student's parent has filed an authorization with the student's principal for the student to possess and self-administer the medication. The authorization must include the physician's statement described below in #2.
2. A physician states in writing that:
 - a. the student has an acute or chronic disease or medical condition for which the physician has prescribed medication;
 - b. the student has been instructed in how to self-administer the medication; and
 - c. the nature of the disease or medical condition requires emergency administration of the medication.

The authorization and statement described in subsection (2) must be filed with a student's principal annually.

Students with diabetes, seizures, or chronic diseases shall be appropriately accommodated per Indiana statutes. An appropriate plan for the student, which may be a Section 504 Plan, individual health plan, or IEP, will be developed and implemented.

Transportation of Medications by Students

Medication that is possessed by a school for administration during school hours or at school functions for a student may be released to:

1. The student's parent or guardian;
2. An individual who is at least eighteen years of age and designated in writing by the student's parent or guardian to receive the medication; or
3. The student if the student's parent provides written permission for the student to receive the medication. (Note: This section does not apply to medication possessed by a student for self-administration under Indiana Code or this Policy, as specified above).

Do Not Resuscitate (DNR) Orders / Physician Orders for Scope of Treatment (POST) Forms

Each student with a potentially life-threatening medical condition should have a health care plan and/or emergency medical plan. Corporation employees shall follow normal procedures for addressing emergencies occurring while students are on Corporation property (including being transported in vehicles owned, leased, or operated by Corporation); and during Corporation events, even if held outside of Corporation property (for example, prom or field trips).

Therefore, Corporation employees will not adhere to Do Not Resuscitate (DNR) Orders or Physician Orders for Scope of Treatment (POST) forms which prohibit individuals from administering resuscitation (CPR) or medical interventions measures to a student. This policy shall not interfere with a health care provider's obligation under Indiana law.

If the school is presented with a DNR order or POST form, the parent or guardian should be advised of the Corporation's policy and should be directed to the hospital(s) in the area where the student may be transported in an emergency and advised to discuss the order with such facility.

Student Concussions and Sudden Cardiac Arrest

Corporation employees shall abide by legal obligations regarding student athletes and avoiding injuries, including informing and educating coaches, student athletes, and parents of student athletes regarding the nature and risk of concussion, head injury, and sudden cardiac arrest to student athletes. The Board has determined that it may enhance school safety to have an automatic external defibrillator (AED) placed in building(s) within the Corporation for use by employees with proper training. The Board directs the Superintendent to develop guidelines that govern AEDs, including the use of the AED, placement of the AED, training and oversight by a medical doctor or by the local EMS Medical Director.

Communicable Diseases

The Corporation will collaborate with and follow guidance from the Indiana State Department of Health to meet its obligations to control communicable diseases impacting the school community. See *Policy A325 Communicable Disease*.

Immunizations

Consistent with state law, the School Board requires that all students be immunized in accordance with the requirements of the Indiana State Department of Health (ISDH).

The Superintendent shall require parents to furnish to their child's school, no later than the first day of school attendance, proof of the student's immunization status, either as a written document from the health care provider who administered the immunization or documentation provided from the state immunization data registry. Students whose parents do not provide the required documentation by the first day of school attendance may be granted a twenty (20) school day waiver. However, if the student remains unimmunized at the close of the twenty (20) school day waiver period, the student may not be permitted to attend school, unless the parents have filed a religious or medical exemption in accordance with state law.

The Superintendent or his or her designee will provide information concerning meningococcal disease (meningitis) and its vaccines to students and parents or guardians at the beginning of each school year.

The Corporation shall provide each parent of a student who is entering grade 6 with information prescribed by the state department of health concerning the link between cancer and the human papillomavirus (HPV) infection and that an immunization against the human papillomavirus (HPV) infection is available.

The Corporation shall provide materials concerning immunizations and immunization preventable diseases to parents and guardians of students. Posting the materials on the school building's website shall satisfy the distribution requirement.

The Superintendent shall ensure that all applicable immunization information is complete in the state immunization data registry (CHIRP) no later than the first Friday in February each year.

Mental Health Treatment Notification

Prior to referring a student to a provider of mental health services due to a pattern of aberrant or abnormal behavior, a school official will contact a student's parent. A school official shall also hold a conference with the student and the student's parent prior to referring student to a provider of mental health services.
